

Use of Siemens Digital Tachograph (V U)

Clear VU display of any messages - press 'OK' to clear
(ie.: driving without card / power interruption)

Insert valid driver card into the 'Driver 1' (+ Driver 2*) slot
(chip upwards & nearest the VU : *when double manning only)

Display - Driver's name

Display - The last withdrawal details

Display - Manual entry

(refer to overleaf when this is necessary, as by law any
duties carried-out since the last withdrawal must be entered)

If none, toggle to 'No' and 'OK' to confirm

Display - Begin Country

(NOT required from 1.4 version onwards; straight to standard display)

Toggle 'OK' to confirm

(ensure it's the correct Country)

Display - Driving (Standard)

(must show complete card  pictogram for Driver's 1 (2*))

**Mode
Symbols**

Driving

Other work

P O A

Daily/Weekly Rest

When stationary select 'Other Work', 'P O A' or 'Rest / Break'
(the mode button must be used to record duties correctly)

When driving press 'OK' twice to confirm 'Overspeed' or 'Rest' infringements

Press the  button by 'Driver 1 / 2*' button to eject the card
(*when double manning only)

Display - End Country

Use switch to toggle 'OK' to confirm
(ensure it's the correct Country)

Display - Ejecting Card with Driver's name

Display - 24hr day

Toggle to 'No' and 'OK' to confirm
(unless a print-out is required)

Card will eject

Remember:

To carry sufficient spare digi rolls in the vehicle (1 / 2), and ensure all
infringements / errors are noted on the reverse of a digi roll print-out

The internal time is at UTC which in BST time, will differ by 1 hour
