* travelling in excess of 100 miles would incur mileage charges based on 45p per mile

The above prices will be dependant on a company using our tachograph analysis software and for the vehicles to be fitted with remote tachograph download devices; to also include tracking if required. They will also be required to use our walkaround check app but this will be at extra cost.

However, we will, at no extra charge, include all your qualifying vehicles for which the price will be based onto our on-line fleet maintenance and management portal. As part of the service, we will maintain this and keep it up to date, but we will give access to anyone within the company who requires it.
